

What are the exact zoning laws, health department permit costs, and current average commercial rent per square foot for a new restaurant requiring a grease trap installation on Green Street in Champaign, IL?

Exact details on zoning laws, health permit costs, and commercial rents for a new restaurant on Green Street in Champaign, IL, are not fully available from public online sources, as they depend on specific addresses, zoning districts, and current listings.

Zoning Laws

Green Street in Champaign's downtown area, near the University of Illinois, falls primarily under Central Business (CB) zoning districts per city regulations. Restaurants are permitted in CB districts, but require compliance with Chapter 37 of the Champaign Municipal Code, covering building size, setbacks, parking, signs, and screening; special permits may be needed for outdoor cafes or sidewalk areas on Green Street. A grease trap installation must meet general plumbing and sanitary standards in the zoning ordinance, but exact requirements (e.g., size, location) are interpreted by the Zoning Administrator; contact them at 217-403-8800 for site-specific verification, as full zoning maps and ordinance texts are not detailed online here.^[1]^[2]

Health Department Permits and Grease Traps

New restaurants require a plan review and annual permit from the Champaign-Urbana Public Health District (C-UPHD), incorporating Illinois Food Service Sanitation Code (77 Ill. Adm. Code 750), which mandates grease traps under plumbing rules (Section 750.1090) if fats/oils/grease are used to prevent sewer clogs. Plan review fees for new construction are \$200–\$500 based on square footage (e.g., \$300 for 1,001–10,000 sq ft), plus annual operating permits of \$300–\$400 depending on risk level (medium/high priority for most restaurants). Submit plans including grease trap details for approval; no specific grease trap costs or sizes are listed, but they must be accessible and comply with state code—contact C-UPHD at 217-373-7900 for exact specs and inspections.^[3] ^[4] ^[1]

Commercial Rent

Current average commercial/retail rent on Green Street varies by listing, with recent examples at \$20–\$34 per square foot per year (e.g., \$34/SF/YR at 505 E Green St for 1,640 SF; \$20/SF/YR at 107 W Green St). Champaign-wide retail averages around \$16–\$17/SF/YR, but Green Street's prime location near campus drives higher rates up to \$34/SF (triple net, excluding utilities/taxes). Rates are negotiable and fluctuate; check LoopNet or local brokers for March 2026 listings, as no single "average" is published for the street.^{[5] [6] [7] [8]}

For precise, binding info, consult City of Champaign Planning (zoning), C-UPHD (permits/grease trap), and real estate sites/brokers directly, as regulations evolve and site-specific reviews are required.
