

Survey Question

Interviewee: DX Project Manager in the Energy Sector (leading AI tool integration and development)

Question	Rating: Strongly Disagree (1) ~ Strongly Agree (5)	comment
I think that I would like to use this system frequently	3	The frequent use means trying to open the shop often. It would be nice for your app to cover the startup stage, growth stage etc, so that it could be frequently used.
I found the system unnecessarily complex	1	I think it is too simple. I think the owners of new business are seeking the best choice rather than pre-defined direction. Your app expects the owner to have already decided the budget, business style etc before entering the app. You better show the possible options to the owners, so that they can decide what direction is better to consider.
I thought the system was easy to use	5	Easy to use,,,you better tune the questions towards more realistic answers.
I think that I would need the support of a technical person to be able to use this system	1	No need to have technical person, rather, good manual needed.
I found the various functions in this system were well integrated	5	
I thought there was too much inconsistency in this system	3	Not sure as I dont have much knowledge of restaurant business.
I would imagine that most people would learn to use this system very quickly	5	I guess so
I found the system very	1	Not at all, I feel that it is still

cumbersome to use		pre-matured.
I felt very confident using the system	3	Not able to judge at this stage.
I needed to learn a lot of things before I could get going with this system	5	If no proper guidance, it will. I think the several tutorials need to be prepared.

Qualitative questions

1. What part of the tool was most useful? : easy to answer, also cell phone display is properly modified automatically.
2. What part felt confusing?: how details are needed for each question. Street No? Business concept, target customers?
3. Did the AI suggestions feel locally grounded?
4. Did the manual feel specific enough for a beginner founder?
5. What information was missing?
6. Would you trust this tool for early restaurant planning? Why or why not?
